

WG 5 FAIRMODE MANAGEMENT PRACTICES

Pilot region/city:
Sweden / Stockholm

Matthew Ross-Jones
Air Quality Unit

Swedish participation in FAIRMODE

Swedish EPA

- National body responsible for international cooperation, legislation, guidance, coordination of AQ assessment & management and reporting

Swedish Meteorological & Hydrological Institute

- National reference laboratory for air quality modelling
- Member of Fairmode WG1 & CEN/TC 264/WG 43 & WG 44
- Users of delta tool for national validation exercises
- Contribution to composite mapping exercise (national maps)

SLB-analys / City of Stockholm

- AQ assessment in the city and region of Stockholm
- Member of Fairmode WG2
- Contribution to composite mapping exercise (regional maps)

Swedish EPA's expectations for the pilot

- Properly test tools and guidance at national & local level
- Gain better insight into how we can utilise FAIRMODE products to improve practice and guidance within Sweden
- Provide feedback on potential improvements to FAIRMODE products & areas where further development is needed
