

Summary Session WG2: Composite emission mapping

- Define the purpose;
- Visualization tool to support emissions benchmarking activities;
- Which data could be visualize in different layers
 - BUP Emission Inventories;
 - TOP Emission Inventories;
 - Diagrams produced by the Emission Benchmarking tool (e.g. Diamond)
 - Ancillary data for downscaling processes;
 - Industrial point sources (e.g. E-PRTR);

Summary Session WG2: Composite emission mapping

- Willingness to share the available data;
- Sharing depends on time/resource availability;
- Confidentiality issues, open / restricted to FAIRMODE community;
- How to keep it alive
- Define the purpose
